reprint of the original first published in 1876 the antigonos publishing house specialises in the publication of reprints of historical books we make sure that these works are made available to the public in good condition in order to preserve their cultural heritage

lists one of the most archaic literary genres stand behind many of our complex mental or rhetorical structures and they often influence the way we conceptualize the world even if we are unaware of it they seem plain but may conceal a complicated inner logic they are agrammatical but may tell a story their basic features selection order and layout may be enough to give them enormous power by including they exclude by ordering they create a hierarchy by taking on particular physical aspects they place themselves into a specific context these and other issues are discussed in the present transdisciplinary volume collecting the best revised contributions to a workshop on lists held at the center for theoretical study in prague in november 2008 each of the 13 articles by researchers from seven countries provides a case study on the subject of list the fields covered include late antique medieval and early modern history philology philosophy cognitive and computer science the contributors aim both at presenting particular cases specific lists or list types and at the same time at addressing methodological issues exploring the ways of researching lists in their particular disciplines formulating relevant research themes and questions contextualizing the subject since theoretical discourse on lists has not been established yet this volume should be seen as a first step in the process showing the variety of possible research directions on a transdisciplinary level and raising interest in the topic which although it may seem a bit obscure at first has indeed a lot to offer

a textbook on computer science

programming languages an active learning approach introduces students to three programming paradigms object oriented imperative languages using c and ruby functional languages using standard ml and logic programming using prolog this interactive textbook is intended to be used in and outside of class each chapter follows a pattern of presenting a topic followed by a practice exercise or exercises that encourage students to try what they have just read this textbook is best suited for students with a 2 3 course introduction to imperative programming key features 1 accessible structure guides the student through various programming languages 2 seamlessly integrated practice exercises 3 classroom tested 4 online support materials advance praise the programming languages book market is overflowing with books but none like this in many ways it is precisely the book i have been searching for to use in my own programming languages course one of the main challenges i perpetually face is how to teach students to program in functional and logical languages but also how to teach them about compilers this book melds the two approaches very well david musicant carleton college

When somebody should go to the books stores, search

initiation by shop, shelf by shelf, it is truly problematic.
